About This Content

In order to be able to use this add-on livery product, you MUST first own the First Capital Connect Class 319 Loco Add-On. If you check in the in-game store it will verify if you own it before you purchase.

The British Rail Class 319 dual-voltage electric multiple-unit (EMU) trains were built by BREL, York, in two batches in 1987–88 and 1990. The trains were introduced for new north-south cross-London services from Bedford to Brighton, and since privatisation these services have been operated by Thameslink and First Capital Connect, the former franchise having been merged with the Great Northern section of the former WAGN franchise to form the latter train operating company on 1 April 2006 as a result of re-franchising. Class 319 units have dual-power pick-up, from either 25 kV alternating current (AC) overhead lines for services north of London, or 750 V direct current (DC) third rail to the south. However, some units were used only on outer suburban services in South London.
It is presented in this pack in its white and grey Network Southeast liveries.

You must own the First Capital Connect Class 319 Loco Add-On before you will be able to use this add-on.

Title: Network South East Class 319 Add-on Livery
Genre: Simulation
Developer:
Dovetail Games
Publisher:

Avoid at all costs as it doesn't work. A nice couple of NSE liveries for the 319, one is the normal white\/red\/blue and the other is grey\/red\/blue in both AC and DC modes. Pretty much what it says and what you see on the tin is what you get in this pack.

But for those that skip the content description the FCC 319 is REQUIRED for this to work.
